[Word Count: 94]

**Mariam Hassan, MBBS, MSc**

Mariam Hassan is clinical researcher and a bioethicist at a not-for-profit cancer treatment and research facility in Pakistan. She holds a first professional degree in medicine and an MSc in clinical trials completed from the University of Edinburgh, UK. She also holds a post graduate diploma in bioethics from the Centre of Biomedical Ethics and Culture (CBEC) , Pakistan, the first WHO collaborative centre for Bioethics in the Eastern Mediterranean Region. Her

professional career spans 18 years during which she held leadership roles and has been responsible for oversight of the scientific and ethical review of research as well as responsible research conduct, research related education, capacity development and policy making. She has worked in various consulting and collaborative capacities with international academic and development sectors including the WHO (World Health Organization), The Global Health Network (TGHN) , Bill and Melinda Gates Foundation and the University of Stanford, USA. Her interests include capacity development for high quality health research in low resource settings and exploring the role of syndemic frameworks in control of non-communicable diseases

### **Fernando Lolas, MD IDFAPA**

Dr. Lolas is currently Professor at the University of Chile and at the Central University of Chile, Director of the Interdisciplinary Center for Studies in Bioethics at the University of Chile and Vice-President for Latin America of the World Federation for Mental Health. NIH Postdoctoral Fellow in Neuroscience and Alumni Prize of the Alexander von Humboldt Foundation with specialization in Psychosomatic Medicine at the University of Heidelberg (Germany) has published extensively in the fields of psychiatry and bioethics and serves on the editorial board of relevant journals (World Psychiatry, World Social Psychiatry, Acta Bioethica, BMC Medical Ethics, Transcultural Psychiatry, among others).

He is a PI in NIH-funded grants for Bioethics and Research Integrity Training and former Member of the UNESCO International Bioethics Committee, the contributions of GFREI have been essential for getting a comparative view on international documents for which public consultations have been made. The main result from this participation has been to increase awareness on practices for human research oversight and the development of training materials for advanced students and practitioners. Outcomes from this exercise over time have been integrated into practices at institutions in Chile, Argentina, and Mexico, as consultant and adviser to different academic institutions.

### **Rita Sitorus, MD, PhD**

Rita Sita Sitorus – a professor, senior researcher at Faculty of Medicine Universitas Indonesia, CiptoMangunkusumo Hospital – is a pediatric-ophthalmologist. She spent about 5 years in Germany, Japan, the Netherlands, performing research on clinical & molecular-genetic eye diseases, completed PhD-degree at Vrije University-mc, Amsterdam. She is the chairperson of REC FMUI, CM Hospital; Supervisory Board of Forum for Indonesian Recognized-REC (FIRREC), member of Reviewer Team of Transfer of Material, Information, Data-Content of the Health-Development-Policy-Agency, Indonesia Ministry of Health. Her special interests include capacity building for high quality RECs, academic research institute in LMICs, developing collaborative network on ethics and integrity globally.

**Yeyang Su, PhD**

Dr Yeyang Su is an Associate Research Fellow at Hangzhou Institute of Medicine, Chinese Academy of Sciences. Her research resides at the intersection of novel medicine, society and policy. With education and research backgrounds in genetics/genomics, bioethics and anthropology, she aims to use transdisciplinary research to enrich our understanding of anthropos in the contemporary, wherein our in-the-making relations and interactions with novel health technologies play a critical role. To better understand the potential and implications of health innovations in the real world, Dr Su has been working closely with various research and industry communities as well as patients and patient organisations. Her recent research focuses on the emerging patient-driven rare diseases research and AI for Science initiatives in China.
