---

Period ending 08 Nov 2026 :: Number 626

This weekly digest is intended to aggregate and distill key content from a broad spectrum of practice domains and organization types including UN system agencies, IGOs/NGOs, governments, academic and research institutions, consortiums and collaborations, foundations, and commercial organizations. We also monitor a spectrum of peer- reviewed journals and general media channels. The Sentinel's geographic scope is global/regional but selected country-level content is included. We recognize that this spectrum/scope yields an indicative and not an exhaustive product.

The Sentinel is published as a PDF, scheduled for release each weekend. The PDF is posted at https://ge2p2-center.net/.

Request email delivery of the pdf:
If you would like to receive the PDF of each edition via email [Constant Contact], please send your request to david.r.curry@ge2p2global.org

Human Rights Committee and Committee on Economic, Social and Cultural Rights Celebrate Sixtieth Anniversaries of their Covenants

Meeting summaries Treaty bodies
06 November 2026

The Human Rights Committee and the Committee on Economic, Social and Cultural Rights this afternoon held an event to mark **the sixtieth anniversaries of their respective Covenants:**
:: the International Covenant on Civil and Political Rights and
:: the International Covenant on Economic, Social and Cultural Rights.

The Human Rights Committee also concluded its one hundred and forty-sixth session after adopting concluding observations on the reports of Austria, Cameroon, Jamaica and Rwanda, the States parties with which the Committee held dialogues during the session; and adopted general comment 38 on the right to freedom of association.

Opening the event, Mahamane Cissé-Gouro, Director, Human Rights Council and Treaty Mechanisms Division, Office of the High Commissioner for Human Rights, said **60 years ago, the adoption of the two International Covenants transformed the principles of the Universal Declaration of Human Rights into binding legal obligations, anchored in respect for human dignity**. While the world had changed profoundly since then, one principle remained constant: human rights were not privileges granted by States, but rights that States were obliged to respect, protect and fulfil.

Preeti Saran, Chair of the Committee on Economic, Social and Cultural Rights, said in opening remarks that **both Covenants, together with the Universal Declaration of Human Rights, formed the International Bill of Human Rights. For six decades, they had served as the foundation of international human rights law** and inspired a broader system of treaties, institutions and accountability mechanisms. At a time when the rules-based international order faced significant challenges, their importance remained undiminished.

Changrok Soh, Chair of the Human Rights Committee, said 60 years ago, the General Assembly adopted the two Covenants on the same day. Today, the two Committees marked this anniversary together. This was significant, because while civil and political rights, and economic, social and cultural rights, were set out in separate treaties, they had never been separated in people's lives…

The final panel discussion turned its attention to "The future: challenges and the way forward", with speakers discussing emerging issues related to the digital realm and climate change and proposing methods of strengthening synergies between the two Committees for addressing these challenges…

[Report continues with extensive quotations form various panelists]

International Disputes

Security Council Adopts Presidential Statement Directing All States to Use Peaceful Means in Settling International Disputes

5 November 2026 *Meetings Coverage*
SC/16500

Reaffirming its commitment to the principles of the UN Charter, **the Security Council today reiterated that all States shall use peaceful means — dialogue, diplomatic engagement and cooperation — to settle their international disputes so international peace and security and justice are not endangered**.

Adopting a presidential statement (to be issued as document S/PRST/2026/5), the Council reaffirmed its **active support to conform with the Charter, particularly Chapter VI and Article 33** and engage throughout all stages of a conflict to peacefully settle disputes. The statement recalls its previous resolution 2788 (2025) and presidential statements S/PRST/2008/36 and S/PRST/2009/8 on mediation and settlement of disputes.

The 15-member organ recognized that significant ways to prevent the escalation of disputes include timely diplomatic efforts, mediation, confidence-building and facilitation of dialogue at the international, regional and subregional levels. **The Council emphasized that diplomatic engagement, in accordance with the Charter, remains important when active hostilities have commenced.** This diplomatic engagement can be used to contain and reverse escalation, ensure protection of civilians, reduce the risk of the conflict widening, facilitate cessations of hostilities and ceasefires, facilitate safe and unhindered humanitarian access, and create conditions conducive to a peaceful settlement.

The Council emphasized the appropriate use of good offices and maintaining direct as well as indirect communication channels between parties to armed conflict. This can enable a stop of hostilities and de-escalation, reduce the risk of miscalculation, and create opportunities for dialogue and sustained political engagement. It stressed that the principal responsibility for peacefully settling disputes rests with the parties to the conflict. In line with the Charter's provisions, these parties' full participation and genuine commitment to resolve the conflict, including its underlying causes, will help achieve and sustain peace.

Recalling and recognizing important contributions to be made by Member States, the Council encouraged their continued efforts in accordance with international law. The organ also recalled regional and subregional organizations' important contribution and welcomed their efforts to enhance their mediation role, consistent with the Charter. **The Council encouraged strengthened cooperation between the United Nations and these regional and subregional organizations.**

Emphasizing the important role the Secretary-General, his representatives, envoys and United Nations mediators can play to promote mediation and peacefully settle disputes, the Council encouraged their continued support of timely diplomatic efforts to de-escalate and peacefully resolve armed conflicts.

The Council stressed that diplomatic efforts towards de-escalation, mediation, cessation of hostilities and peaceful settlement need to be undertaken in accordance with the Charter and relevant Council resolutions and statements. It further recognized the important role of relevant United Nations organs, in accordance with their mandates.

It emphasized the International Court of Justice's important role to adjudicate disputes with the consent of the States to its jurisdiction. The Council reaffirmed its commitment to

maintaining international peace and security in accordance with international law, including international humanitarian law and relevant Charter provisions.

Finally, the Council requested the Secretary-General to continue, in accordance with the Charter, to promote and support dialogue, diplomacy, de-escalation, mediation and the pacific settlement of disputes — before and during armed conflict — and support sustainable political solutions, including through his good offices and relevant United Nations capacities. It requested the Secretary-General to keep the Council appropriately informed of his efforts.

Special Procedures mandate holders

UN experts condemn personal attacks and intimidation against Special Procedures mandate holders

6 Nov 2026 Press releases

GENEVA – **UN experts* today expressed grave concern about escalating personal insults, derogatory remarks, threats and intimidating statements directed at Special Procedures mandate holders, including during official proceedings of the United Nations**, by some States and other actors.

"States have every right to question, challenge or disagree with the findings, conclusions and recommendations of independent human rights experts. Such constructive scrutiny is an essential part of the interactive dialogue between States and the Special Procedures of the Human Rights Council," the experts said. "However, personal insults, degrading language and attempts to intimidate mandate holders have no place in such dialogue."

We are also seriously concerned about false allegations related to how our mandates are funded and how we use those resources. It is common practice for UN Member States to provide voluntary contributions to Special Procedures. Voluntary contributions received by OHCHR are strictly governed by UN financial rules, policies and oversight mechanisms. They do not give donors any role in the appointment, direction, priorities, findings or conclusions of mandate holders. There is full transparency about the resources received by mandate holders that are declared on a yearly basis.

The experts expressed particular concern over the increasingly frequent use of personal attacks and public vilification in place of substantive engagement with the findings of independent human rights experts. The experts called on the UN leadership and presiding officers to take proactive steps to prevent recurrence of such attacks.

"Attacking the messenger does not discredit the accuracy of the evidence about serious breaches of international human rights law and international humanitarian law. Personal attacks do not replace a substantive response to documented human rights concerns, and should not be used by States to distract from their responsibility to address them," the experts said.

"We call on all Member States to engage with Special Procedures in good faith and respect the independence and integrity of United Nations human rights mechanisms. States should also grant physical access to mandate holders in order to assess first-hand the human rights situation on the ground," they said.

"Malicious personal attacks have no place in the United Nations and must never be normalised as part of political debate. The independence of Special Procedures must be respected. We reaffirm our commitment to fulfilling the mandates entrusted to us by the Human Rights Council and in line with its Code of Conduct."

"While such attacks divert our energy and time to defending ourselves rather than advancing human rights, we refuse to be silenced and we will continue to speak out against human rights abuses worldwide."

**The experts:*

- George Katrougalos (Chair), Elisa Morgera, Fernanda Hopenhaym, Laura Nyirinkindi, Farida Shaheed and Surya Deva, Coordination Committee of Special Procedures
- Cecilia M. Bailliet, Independent Expert on human rights and international solidarity
- Graeme Reid, Independent Expert on protection against violence and discrimination based on sexual orientation and gender identity
- Eduardo González, Independent Expert on the situation of human rights in Mali
- Alexandra Xanthaki, Special Rapporteur in the field of cultural rights
- Koldo Casla, Special Rapporteur on adequate housing as a component of the right to an adequate standard of living, and on the right to non-discrimination in this context

ICC

General Assembly Condemns Threats to International Criminal Court, as Tribunal's Presidents Warns of Unprecedented Challenges to Its Independence

2 November 2026 *Meetings Coverage*
GA/12804

Facing mounting sanctions and intimidation targeting its judges and prosecutors, **the International Criminal Court is confronting an unprecedented challenge to its independence, its President warned the General Assembly today, as delegates sharply disagreed over the Court's role in delivering international justice.**

"When Judges are punished for their decisions, whether through sanctions or through criminal convictions, it is not only those Judges who are targeted, but judicial independence itself", said Tomoko Akane, addressing the Assembly virtually after being subjected to United States sanctions.

By a recorded vote of 93 in favour to 13 against, with 36 abstentions, the Assembly adopted a resolution (document A/81/L.11) welcoming the Court's report on its activities from 1 August 2025 to 31 July 2026 (document A/81/329), and condemning threats, attacks and interference against the body and its personnel.

The Court must be able to carry out its duties "without intimidation", the Assembly stressed, calling on all States to cooperate with the Court in arresting and surrendering suspects, gathering evidence and enforcing sentences. **The text encouraged States that have not joined the Rome Statute to do so without delay.**

Opening the Assembly's annual debate on the Court's activity, Assembly President Khalilur Rahman (Bangladesh) emphasized the importance of respecting the distinct legal frameworks governing the

United Nations and the Court. Respect for this arrangement is "a central element of the international legal order", he said…

ICC President addresses United Nations General Assembly, Calls for renewed support amid threats

ICC Press Release 2 November 2026

The President of the International Criminal Court (ICC), Judge Tomoko Akane, today addressed the United Nations General Assembly to present the Court's annual report, outlining key judicial developments, reparations activities, cooperation efforts, and the challenges facing the institution. For the first time since the COVID-19 pandemic, the President addressed General Assembly by way of a pre-recorded video, following the United States' imposition of sanctions against the Court on 9 October 2026.

In her address, President Akane reaffirmed the Court's determination to fulfil its judicial mandate despite sanctions, threats and other challenges facing the institution. "Despite all the challenges, the International Criminal Court will continue to carry out its judicial mandate with full independence and impartiality, acting only on the basis of the law and the evidence. In so doing, the Court is firmly resolved to contribute to the rule of law in the international community".

In relation to the Court's judicial activities, President Akane noted that proceedings continued to advance at every stage, from investigations and arrest warrants to confirmation of charges, trials, appeals and reparations. Victims remained at the centre of the Court's work. During the reporting period, more than 23,500 victims participated in proceedings before the Court, including more than 7,000 at the reparations stage.

The President highlighted the central importance of cooperation in the execution of arrest warrants. At present, 34 publicly known arrest warrants remained outstanding. "For States Parties, cooperation is a legal obligation under Part 9 of the Statute, and the obligation to arrest and surrender lies at its heart", she said...

Armed Conflict and the Natural Environment

Protecting the natural environment in armed conflict

Armed conflict damages the natural environment that communities depend on to survive. New ICRC guidance sets out practical steps states can take to put the rules protecting it into practice.
05-11-2026 20 pages PDF: https://www.icrc.org/en/article/protecting-natural-environment-armed-conflict#link-banner1806009

Countries affected by armed conflict must cope at the same time with a rapidly intensifying global environmental and climate crisis. Armed conflicts deepen that crisis by damaging the environment and reducing people's resilience to climate shocks and erratic weather.

Natural ecosystems have declined by almost 50% on average over the past 50 years, and around 25% of animal and plant species are close to extinction. Conflict is one indirect driver of that loss. This is dangerous, partly because ecosystems and biodiversity are crucial for sustaining human life and helping people adapt to climate change.

How international humanitarian law protects the environment

International humanitarian law (IHL) protects the natural environment during armed conflict. Its rules prohibit:

- using means or methods of warfare that are intended, or may be expected, to cause widespread, long-term and severe damage to the natural environment.
- attacking any part of the natural environment, unless it is a military objective.
- launching an attack against a military objective which may be expected to cause incidental damage to the environment which would be excessive in relation to the concrete and direct military advantage anticipated.
- destruction of any part of the natural environment, unless required by imperative military necessity.
- pillage of the natural environment, including natural resources.

From rules to practice

To safeguard the environment of conflict-affected communities and future generations, states and non-state armed groups need to accelerate the implementation of IHL rules protecting the natural environment.

The ICRC's 2020 Guidelines on the Protection of the Natural Environment in Armed Conflict set out 32 rules and recommendations relevant to reducing wartime environmental damage. The new implementation guidance builds on them. It sets out concrete measures for national authorities, with checklists and examples of state practice, across seven areas:

- The prohibition of widespread, long-term and severe environmental damage
- Protection of the environment under the general rules on the conduct of hostilities
- The prohibition of hostile use of environmental modification techniques
- Measures to understand and minimize the environmental impact of military operations
- Designating fragile environmental zones as protected zones
- Weapons reviews that include the environment
- Dissemination of and training on these rules

The guidance also supports implementation of the *UN International Law Commission's Principles on Protection of the Environment in Relation to Armed Conflicts.*

LMIC External Debt

Developing Countries' External Debt Surges to Record $9.4 Trillion

Private creditors returned in force and bond markets reopened, but poorest countries' borrowing faced highest costs in decades.

WASHINGTON, Nov. 5, 2026—**External debt of developing countries jumped 5.5% to a record $9.4 trillion in 2025,** the fastest pace since 2021 and **about four times the 2022–24 average,** according to the World Bank Group's International Debt Report 2026. Access to international finance has improved, but the price of finance has not, and high debt burdens in the poorest countries threaten to crowd out essential investments in people.

Private financing drove much of the increase. Borrowing from private creditors jumped and bond issuance from public entities rose nearly 35% to $251 billion, the highest level in five years as markets reopened to many developing countries. External debt grew fastest among the most vulnerable countries, increasing 8.1% to $1.3 trillion in countries eligible for concessional financing from the World Bank Group's International Development Association (IDA).

"The return of private lending to low- and middle-income countries is welcome, but these

countries are borrowing more, paying more, and in many cases leaving less for long-term development," said Haishan Fu, World Bank Group Chief Statistician and Director of Development Data. "Managing debt responsibly means giving everyone—including future generations—a chance to thrive."

Many governments issued new bonds to buy back maturing debt, smoothing repayment profiles without significantly reducing debt stocks, often at higher interest rates. Early 2026 data show continued demand for international bond financing from low- and middle-income countries despite the high costs. By mid-August, more than 10 countries had exceeded their full-year 2025 issuance, while several others returned to international markets.

IDA-eligible countries paid an average of 8.2% on new private-creditor commitments in 2025—the highest rate since 1989—and 9.4% on new bonds. The gap between the rates IDA-eligible countries paid to official and private creditors widened from 3.4 percentage points in 2016 to 5.5 percentage points in 2025.

In comparison, countries eligible for only non-concessional loans from the World Bank Group's International Bank for Reconstruction and Development (IBRD) paid an average of 5.5% on new bonds, an improvement from the 5.8% rate the previous year.

Debt-service pressures remained severe amid elevated global interest rates. Low- and middle-income countries paid $1.4 trillion in principal and interest in 2025, up 1.9% and marking a fifth consecutive annual increase. Payments to bondholders climbed to $363 billion, partly reflecting debt buybacks and prepayments financed through new bond issues.

Between 2022 through 2025, developing countries paid $436 billion more in debt service than they received in new financing. The direction shifted in 2025, however, as long-term debt flows turned from a $118 billion net outflow in 2024 to a net inflow of $45 billion.

Currency movements also played a role in the reported increase. More than a quarter of the $303 billion increase in public and publicly guaranteed debt reflected the weaker US dollar, which raised the dollar value of debt denominated in other currencies. For several of the largest concessional borrowers, these currency effects outweighed the principal they repaid in 2025, leaving reported debt higher despite continued servicing.

Climate Change and Health

The Lancet
Nov 07, 2026 Volume 408 Issue 10567 p1917-2036
Countdown
The 2026 report of the Lancet Countdown on health and climate change: a decade of escalating health harms and a decisive moment for all
Marina Romanello, et al. p1979-2032
Executive Summary *[initial text]*
The Lancet Countdown was established 10 years ago in 2016—the year the Paris Agreement entered into force—to annually assess the effects of climate change on health, and the health benefits of climate change interventions. Although insufficient to meet its goals, action since then has reduced projected greenhouse gas emissions, lowering end-of-21st-century expected temperature increase from 3·0–3·5°C to 2·6–3·4°C.

The growth of zero-emission energy has exceeded expectations, delivering health and economic benefits globally. In parallel, recognition of the links between health and climate change has increased substantially (indicators 5.1–5.6), and tackling climate change has become a priority for global health, with WHO identifying it as the first strategic objective in its Fourteenth General Programme of Work.

Despite this progress, greenhouse gas emissions continue to reach record highs, climate change is increasingly affecting health and threatening people's survival worldwide, and the window of opportunity to avoid a potentially catastrophic future is rapidly closing.

Weakening multilateralism and growing climate change disinformation, denialism, and scepticism are now increasingly undermining collective action and threatening to reverse progress to date. Yet, this moment of disruption also presents an opportunity.

The system-wide reform of the UN, under the UN80 initiative, and the impending reform of the Global Health Architecture, provide opportunities to strengthen cross-sectoral coordination, optimise resources, and enable an effective global response to climate change for a healthier future.

Against this backdrop, **the 54 indicators in this report document the growing health impacts of climate change and reveal opportunities for a health-protective response**. The findings inform key and urgent priorities to alter the current direction on health and climate change and protect the health and survival of present and future generations.

Conclusion: the 2026 report of the Lancet Countdown on health and climate change

[excerpts]

A decade since the Paris Agreement entered into force in 2016, **the tenth report of the Lancet Countdown on health and climate change exposes a widening gap between commitments and implementation that increasingly threatens a liveable future.**

Indicators reveal a **measurable acceleration of health risks associated with climate change since the Paris Agreement entered into force,** compared with the previous decade (figure 18A). The speed of increase in risks from heat, drought, extreme precipitation, and infectious diseases such as Vibrio and dengue is growing (indicators 1.1.1, 1.1.3, 1.2.2, 1.2.3, 1.3.1, and 1.3.2), and climate change is causing 369 940 heat-related deaths annually (indicator 1.1.5).

The economic losses associated with these health harms are also growing, increasingly eroding the foundations of good health (indicators 1.1.3 and 4.1.1–4.1.3). With further heating now unavoidable, these risks will continue to worsen, increasing the risk of multiple compounding climate impacts, and pushing the world towards an increasingly dangerous future (panel 3)…

With international diplomacy and security under strain, and geopolitical instability threatening further setbacks, the world is at a crossroads. Urgent, system-wide changes that support robust mitigation and effective adaptation are now needed to protect the lives and health of people globally.397

The data in this report informed global priority actions and enablers to drive this transition (panel 1) and identified the evidence-based targets to ensure health is protected over the upcoming decade (panel 7). Delivering these actions and meeting these targets is no longer just the greatest public health opportunity of the century—it may be the only hope for a safe future.

COP31 explained: What's at stake at this year's UN climate summit
5 November 2026 - Catastrophic floods, deadly heatwaves and prolonged droughts have been a

hallmark of 2026, a year in which scientists confirmed that the world is on track to exceed the Paris Agreement's 1.5°C warming threshold. Against this backdrop, and with a powerful El Niño expected to intensify climate impacts further, representatives of more than 190 countries will gather in Antalya, Türkiye, from 9 to 20 November for COP31, the latest iteration of the keynote annual UN climate conference.

05-11-2026 | DESA
Social Inclusion - a powerful lever for economic growth
5 November 2026 - Today, economic, energy and technological transformations are reshaping societies everywhere. As countries navigate these uncertain waters, how do we make sure ending exclusion stays in focus? The answer is simple: greater inclusion isn't just the right thing to do. It's also the smart thing to do. That is one of the central messages of the World Social Report (2026): 'The New Economics of Social Inclusion - Making Transformations work for All'.

02-11-2026 | DESA
A new economics of social inclusion: transformations that work for all
2 November 2026 - As countries navigate profound economic, digital and energy transformations, the challenge before us is clear: how do we turn those commitments into tangible outcomes for people everywhere? This is one of the defining challenges of our age, which is at the heart of UN DESA's World Social Report 2026.

Press release
Six out of seven journalists' killings are not brought to justice, reversing progress in the fight against impunity
Global impunity for journalist killings has risen for the first time since UNESCO began measuring it in 2012, according to the Organization's latest report. Impunity increased in the 2024-2025 period to 86 per cent, from 85% in the previous biennium. This increase exacerbates the second finding of the UNESCO report, which reveals that 189 journalists were killed in 2024 and 2025, 20% more than during the previous biennium. Just over two thirds of these journalists – 127 - were killed in conflict zones.

IDB Improves Its Transparency Among Major Development Organizations
November 4, 2026
WASHINGTON — The Inter-American Development Bank (IDB) improved its score in the 2026 Aid Transparency Index, reaffirming its position as a leader in transparency among major international development organizations and maintaining second place globally.
The IDB's score in the Aid Transparency Index increased to 97.1 in 2026 from 96.3 in 2024, reflecting its continued commitment to transparent and accountable reporting. The Index, published by Publish What You Fund every two years, is widely recognized as the global benchmark for transparency in development finance…

Humanitarian Blog Posts Selection Nov 01, 2026
[Text bolding from original]
This week's selection examines how conflict, restrictive migration policies, and climate disasters expose gaps in protection and preparedness. A **Palestinian teacher's account from Gaza** captures the reality of **violence that exceeds even dystopian fiction,** while the ICRC calls for the **repatriation of young people who have spent their childhood in detention in Syria and Iraq.** Other articles challenge policies that restrict refugees' economic participation and expand surveillance through alternatives to immigration detention. Meanwhile, **Bangladesh's disaster-induced displacement** and **Nigeria's efforts towards inclusive disaster risk reduction** highlight the need to address vulnerability before crises deepen. **Discussions on AI offer both opportunities and cautions:** from improving evaluation to strengthening flood warnings, technology must remain accountable, inclusive, and responsive to local realities.

U.S. FDA approves first generic injectable lenacapavir for HIV prevention
02 November 2026
:: The U.S. Food and Drug Administration (FDA) has approved the first generic long-acting injectable for HIV prevention, just 16 months after the approval of the originator product. A novel regulatory strategy resulted in one of the fastest timelines to approval for a major HIV innovation to date.
:: Developed by Dr. Reddy's Laboratories with financial, technical, and regulatory support from Unitaid, Wits RHI, and the Clinton Health Access Initiative (CHAI) to accelerate the product's development and regulatory filing and speed up lenacapavir's market entry.
:: Under the existing partnership agreement, Dr. Reddy's lenacapavir injection will be available at US$40 per person per year for the 120 low- and middle-income countries included in Gilead's voluntary license.
:: First supplies of the generic are expected to reach countries before the end of the year, with broader availability in 2027.

How the United States uses multilateral channels for its aid - A comparison with other large donors
Homi Kharas
November 2, 2026
:: Multilaterals earn their place where scale, pooling, neutrality, and leverage matter: humanitarian

logistics, global health commodities, large-scale concessional finance, and budget support in high-risk settings.
:: Excluding contributions to EU institutions, the U.S. provided about one-third of its total aid to or through multilateral agencies in 2025, roughly comparable with other major donors (members of the OECD Development Assistance Committee, or DAC).
:: The U.S. provides its fair share of multilateral humanitarian aid but far less than others in core contributions to multilaterals.
:: The U.S. is a heavy user of earmarked funding. Earmarking has considerable costs. Most U.S. earmarks pay for single-donor projects rather than thematic programs or pooled funds. Reducing earmarking could free up hundreds of millions of dollars annually.
:: The U.S. has never conducted an evidence-based multilateral aid review. The U.S. is a member of the Multilateral Organisation Performance Assessment Network (MOPAN) but has not transparently used this evidence in deciding which multilateral agencies to support and where to request reforms.

Research
Federal deportation efforts: Implications for state child support agencies
Vicki Turetsky and Mark H. Greenberg
November 2, 2026
:: Federal immigration enforcement is likely increasing the number of parents with child support orders who are being detained or deported. Though no research tracks how many parents with child support orders are affected, ICE arrests leading to detention have more than quadrupled since late 2024, there has been a significant increase in interior apprehensions, and more people are at risk of deportation.
:: Detention and deportation can happen quickly. Nearly half of those detained in January 2026 were removed within 30 days, and child support caseworkers may not be able to tell whether a parent who has disappeared was detained, deported, or avoiding contact out of fear. This highlights the need for rapid action by child support agencies to learn if the reason for sudden non-payment is immigration detention.
:: Child support orders don't stop when a parent is detained or deported. Arrears keep accumulating unless the agency reviews the case, talks with custodial parents about their options, and determines whether to act to suspend or review the order. The agency also needs to consider options for international enforcement or case closure if the parent has left the country.
:: Child support agencies need to develop protocols and partnerships, with attention to staff training, clear procedures, task systems, and outreach to immigrant advocacy groups.

Research Nov 4, 2026
Governing Augmentative Brain-Computer Interfaces
This report examines how brain-computer interfaces could augment human capabilities, identifies signals of emerging augmentation, and assesses how governance frameworks can address the ethical and regulatory challenges these uses raise.
… This report provides tools to help policymakers identify signals of BCI-enabled augmentation. We develop a structured characterisation of augmentation and use it to examine the ethical questions it raises and their governance implications. We identify the technical features that may enable

augmentation and the signals that could help policymakers detect or anticipate it. Finally, we draw on other scientific domains to assess how well existing regulatory frameworks can address augmentation, using hypothetical scenarios to test their strengths and limitations.

The report draws on a narrative review of the ethics, governance and technical literature on BCIs and human augmentation, and on interviews with technical and legal experts. A project workshop tested and refined a classification framework distinguishing augmentation from treatment, rehabilitation and optimisation; a subsequent validation workshop with policy experts refined the framework further, ensuring it is usable by a non-technical audience.

The Alan Turing Institute appoints new Chair of the Board
Tuesday 03 Nov 2026

Adrian Belton has been appointed as the new Chair of the Board of Trustees at the Alan Turing Institute, the UK's national institute for artificial intelligence and data science. Belton has taken up his role this week for an initial three-year term.

He brings extensive leadership and governance experience to the Institute across science and technology, health, defence and the environment. He has held executive and board roles across the public and private sectors, beginning his career in banking before becoming Chief Executive of the Central Science Laboratory, the Food and Environment Research Agency, and the Construction Industry Training Board…

Call for Curiosity-Driven Research Case Studies
Oct 21, 2026
The 2027 GRC Annual Meeting will focus on Curiosity-Driven Research (CDR) under the working theme of 'Making a Case for Curiosity-Driven Research'. The discussion will be structured around the following three dimensions outlined in the Discussion Paper:
- Understanding CDR and its role in research ecosystems
- Considering the role of public funders in relation to CDR
- Considering making the case for and communication of CDR

With these three dimensions, the Discussion Paper provides a comprehensive framework on the current state of CDR, highlighting key developments and their implications at various levels. This Call for Case Studies seeks to complement the discussion around CDR by bringing practical experiences and perspectives from GRC participating organisations and research systems in various regional contexts into the conversation…
Please submit your case study, images and organisation logos to the GRC Secretariat (grc@ukri.org) no later than 11 December 2026.

Forum on Neuroscience and Nervous System Disorders
The National Academies of Sciences, Engineering, and Medicine's Forum on Neuroscience and Nervous System Disorders provides an important venue for candid discussions about emerging and critical issues among key stakeholders, including federal agencies that serve as research sponsors and regulators; the private sector; the academic community; and the nonprofit sector, including foundations and disease advocacy groups. The Forum's activities serve to inspire new ideas and shape the field, foster relationships and collaboration, develop an improved understanding of each other's perspectives and priorities, and influence policies and programs.

The Sentinel will track key peer-reviewed journals which address a broad range of interests in human rights, humanitarian response, health and development. It is not intended to be exhaustive. We will add to those monitored below as we encounter relevant content and upon recommendation from readers. We selectively provide full text of abstracts and other content but note that successful access to some of the articles and other content may require subscription or other access arrangement unique to the

publisher. Please suggest additional journals you feel warrant coverage.

This month in *The Journal*
Paul W. Hook, Alyson B. Barnes
Large structural variants (SVs) impact a higher percentage of individual human genomes than SNVs or indels. Despite growing evidence that links them to a variety of phenotypes, SVs have received less attention during investigations into the genetic architecture of diseases, including Alzheimer disease (AD). While some population-based studies have been performed, few individual SVs, or genes repeatedly impacted by SVs, have been robustly identified. In this issue, Quenez et al. set out to expand the catalog of SVs associated with AD risk by using exome sequencing to identify copy-number variants (CNVs) in a large case-control AD cohort.

Anti-Trafficking Review
No. 26 (2026)
https://antitraffickingreview.org/index.php/atrjournal/issue/view/37
Anti-Trafficking Review is the first open access, peer reviewed journal dedicated to the issue of human trafficking. It explores trafficking in its broader context and intersections with gender, labour, and migration.
Special Issue - Corporate Accountability and Forced Labour in Value Chains
Guest Editor: Judy Fudge
This Special Issue of Anti-Trafficking Review examines recent efforts to hold multinational corporations accountable for human rights harms, including forced labour, resulting from their business practices. Contributions from across Asia, Europe, and the Americas analyse various aspects of the shift from voluntary corporate social responsibility measures to legally required or legally enforceable initiatives to address forced labour in global value chains. They interrogate the effectiveness of recently adopted transparency and human rights due diligence legislation across many Global North countries and demonstrate that worker-driven social responsibility, and other bottom-up initiatives, are better placed to reduce exploitation in supply chains than top-down state- and corporate-led approaches.

Climate change: Choices for displaced people
From rising sea levels threatening coastal populations to the intensifying frequency and severity of natural hazards, the climate crisis is rendering homes uninhabitable and futures uncertain for millions – especially for those who have been least responsible for climate change. The contributions to this issue of FMR emphasise that responses to climate displacement must be proactive, rights-based, and human-

centered, moving beyond reactive measures. Authors from five continents share from their unique perspectives to bring you a rich body of articles which we hope will inform and inspire, bringing fresh thinking and provoking debate.

Upholding Humanity in War
27 articles
This Review issue is organized around the seven workstreams of the ICRC's Global Initiative to Galvanize Political Commitment to International Humanitarian Law: "Prevention Good Practices", "National IHL Committees", "IHL and Peace", "Protection of Civilian Infrastructure", "Protection of Hospitals", "Information and Communication Technology" and "Naval Warfare". The interviews and articles in this issue provide a comprehensive overview of the current state of IHL - what is holding, what is fraying and where the most urgent academic and political work is needed.

Rules for Robots
As robots increasingly become part of the urban landscape, local officials must ensure that they are integrated safely and efficiently. There are a lot of existing rules governing vehicles and devices in cities, but which ones should apply to robots and when should new rules be considered? The essays in the Summer 2026 Issues explore this and many other topics, including how community colleges are training the AI workforce, the future of the National Science Board, assessing the costs and benefits of clean air regulations, and how communities are learning to bargain with big tech companies over data centers.

World Heritage Review
n°110 - July 2026
https://whc.unesco.org/en/review
World Heritage
Across the world, heritage reminds us of how societies drew on their history to build the future. As both a legacy of the past and a resource for future generations, it embodies the resilience, creativity and spirit of transmission that enable communities to preserve their identity and adapt to the transformations of their time. This conviction, at the heart of UNESCO's mission, takes on particular resonance on the occasion of the 48th session of the World Heritage Committee, held this year in the Republic of Korea.
The Korean experience vividly illustrates how heritage can accompany the transformations of a society while preserving the foundations of its identity. Over the decades, the country has succeeded in protecting and promoting its cultural and natural heritage while embracing innovation and international cooperation. Today, the Republic of Korea actively contributes to capacity building, knowledge sharing and the implementation of conservation projects benefiting many States Parties to the World Heritage Convention…

The Good Research Practice Roadmap: a guide to research improvement
Gillian Currie, Fiona Jane Ramage, Emma Hall, Jamie McQueen
Date modified: November 4, 2026
Abstract
The scientific community is undergoing a "credibility revolution," aimed at enhancing the reliability and trustworthiness of research by promoting good research practices (GRPs). Despite their importance, adoption of GRPs remains uneven. A key barrier is the fragmentation of guidance on GRPs, which is often scattered across institutional webpages, training materials, handbooks, and external resources, making it difficult for researchers to know where to begin. Implicit communication of research practices - particularly to early-career researchers (ECRs)-risks perpetuating suboptimal habits rather than good ones. To address this, we created the Good Research Practice Roadmap: a website that consolidates guidance, recommendations, and links to further reading into a visually appealing, and user-friendly format.

Public Consultation Opportunities

WMA - Declaration of Taipei Revision Launched *[Ongoing]*

...The Declaration of Taipei tries to achieve a balance between the rights of individuals giving their tissue or data for research and other purposes based on confidentiality and privacy rules while at the same time recognising that health data has become a very powerful tool for increasing knowledge.

In analysing the scenarios that already exist for the use (and misuse) of health data and biobanks, we came to the conclusion that the major risk scenarios may not result from science, but from the commercial, administrative or political use of such data. Limiting our guidelines to research only would have left us blind to the imminent risk of abuse from outside the field of medicine: commercialization, cost-cutting and potential political abuse.

Therefore, in contrast to the Declaration of Helsinki, this policy aims to address any use of health databases and biobanks excluding individual treatment and is not restricted to research. As physicians are the primary custodians of confidential health information, they feel an obligation towards their patients and other persons who entrust them with their data and specimens...

In April 2025, the WMA appointed a workgroup to initiate the revision process of this document. To encourage as much global participation in the revision process as possible, the WMA is collaborating with its members to host a series of regional meetings...
